With few still available, it is a unique, all-analog approach to a classic tube-like overdrive circuit offering 3 different clipping voices, loads of headroom and almost three-dimensional clarity that will push your amp over the edge. The second pedal, the Hizumitas, is a Fuzz Sustainar originally designed for guitar player Wata from the legendary band Boris. The heavy distortion and smooth sustain, combined with an underlying grit was designed to offer unmatched clarity that is unsuspected a typically aggressive sounding pedal.
