---

once you have chosen the map, you are ready to download it. [click here](#) to start the download process. once the download has started, you will see the progress in the interface. the fastest part is the mapping process. you can make use of this time to update the online database that the map is stored. this will improve your experience on the road. once the connection is correct, you can update your new map. the update takes a few moments to complete. once it has finished, you will notice that your tomtom assistant has been updated with the current version of the map, the new speed limits and more. this concludes our guide to updating your gps with a new map. there is also the possibility to add new points of interest to your navigation. however, this process takes longer and you will need to use a computer. learn how to navigate your gps more effectively. hopefully you enjoyed this guide to download a new map or update your map. do you have other questions? please leave a comment or share your experience in the section below and we will answer your question. we prefer to use an external gps, but of course we can use the software to read your current location and choose the path for us. it really doesn't matter where you are starting from, but it really makes a difference where you are going. another thing to consider is that if you are always moving, you may not want to pay for a subscription. most people like to have the option to download the software (map) and try

---

it before they buy the hardware. 5ec8ef588b
